

## Change of course for making education more flexible

We will implement the changes in direction for 2021-2022 in the following new projects:

New projects	Contents	Required budget
4.1 Creation of a target architecture infrastructure for flexible education and lifelong development	Development of a functional and technical target architecture and standards for the infrastructure for flexible education and lifelong development based on a vision for flexible education (see building blocks for flexible education).	PM
4.2 Infrastructure for using study data	Organisation of the infrastructure for using study data based on the vision for data control.	PM
4.3 Tools for online education and digital assessment	Organisation of a vision for a suitable offering for online education and digital assessment and a strategy to realise that offering.	PM
